Sir,

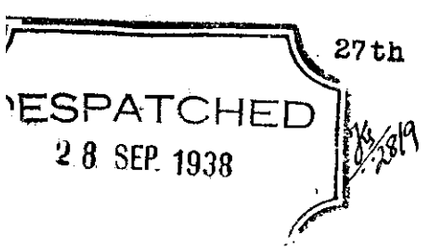
I enclose herewith a copy of the remarks of the Collector on the report of Administration of the Mangalore Municipal Council and a copy of the resolution of the Council on receipt of orders of Government.

Commissioner, M.M.

Forwarded.

B. Venkatarao Baliga 28/9/38

27th September 1938. Chairman, M.C.



R.O.C.No.5776/38.

F o r w a r d e d.

2. The administration of the Municipality continued to be efficient during the year under report. The relations between the Chairman and the Council were cordial, and there is no faction in the Council. 7.84 miles of road have been asphalted during the year at a cost of Rs.84,410/-. This has in a very great measure tended to improve the amenities of the town inasmuch as the dust nuisance on these roads has now abated. I gather that more roads are to be similarly treated during the next hot weather.

3. The problem of water-supply still remains unsolved and there are no signs that any earnest attempts are being made towards the fruition of any good proposal. Certain proposals were considered by a Committee of Councillors as being the most suitable for the conditions of this town which consists of a series of eminences and depressions but it did not, I gather, meet with official approbation and things appear to be at a stand-still. Considering that 131 out of 166 deaths on account of fever were due to enteric it seems that further consideration of the measures to ensure protected water-supply in the Municipality should be explored. Under the ten-year plan of protected water-supply it seems that some of the rural parts in this District would get protected water-supply earlier than the Mangalore Municipality.

4. The Councillors have embarked on a carefully planned 'town-planning' development which is all to the good.

Station Chepauk, Madras, *Dated the* 23rd May 1939

From (Name) Sri A.V. Raman, M.Inst.M.& C.E.,F.R.San.I.

(Designation) Superintending Engineer, (P.H.).

To The Secretary to the Government of Madras,

EDUCATION & PUBLIC HEALTH Department.

Thro' the Chief Engineer, P.W.D., Genl., Bldgs. & Roads.

Sir,

Re: Govt. Memo. No. 42455 E2/38-1 dated 7-10-1938.

I regret that it was not found possible for the Deputy Sanitary Engineer, Southern Circle to make a preliminary inspection of Mangalore and its environs, till 24th March 1939 and the conditions of working of this office did not admit of the case being scrutinised as quickly as I would desire. In these circumstances I apologise to Government for the delay in the disposal of this reference.

2. It is indeed regrettable that Mangalore Municipality has not yet had the benefit of a protected water supply scheme,

even

even though the question was mooted ~~as~~ early as 1895. It is not however due to any lack of interest or lack of professional advice to the Council in the matter. I invite reference to G.O.No. 2719 Ms.P.H. dated 7-11-1929 wherein the papers were recorded by Government. The question was intended to be taken up for consideration after the receipt of the Council's reply regarding the financing of the scheme as set forth in Memo.No.23383-1/32 P.H. dated 18-6-1928. The records of this office do not show any further progress in the matter. The Municipal Council appointed a committee to go into the question and the committee in its proceedings dated 11-7-1936 recommended to the Council that the water supply and drainage schemes should be taken up simultaneously and as early as possible and that the committee was unanimously of opinion that the Hassamar scheme would not satisfy the growing requirements of a town like Mangalore, and especially in view of the contemplated extensions of the town limits. The Committee therefore thought that the council should request the Government to take up the investigation of a different source of water supply which will ensure an adequate supply of water. The Municipal Council accepted the recommendation of the special committee in its resolution No. 46 dated 3-8-1936 and from that time onwards the subject was kept pending, and for one reason or other, this department was not able to make up its mind on the subject. I, again, invite reference to the correspondence ending with the Government Memo. No. 23383-1/32 P.H. dated 18-6-1928. It would be observed that after carefully reconnoitering the environs of Mangalore for a radius of about 10 miles (it was found possible to develop) the Hassamar valley was pitched upon as the most promising and economical source within a reasonable distance of this town. This source has the advantage, over all others, which were considered and dropped, in that it is a gravitational scheme involving a negligible cost in maintenance.

The

The source was expected ordinarily to give a supply of 6 gallons per head per day for a prospective population of 60,000 but it was considered probable to increase the rate of supply to 10 gallons with infiltration galleries below the bund and by increasing the depth of storage by another 10 feet. The municipality would not however accept the scheme on the ground that the limited supply would not meet the growing demands of the town. I do not think the Council is well advised in adopting this attitude. It would seem desirable to utilise the source to its maximum capacity and supplement the supply from another source. There can be no question of abandoning the Hassamar valley scheme at all. It should necessarily form one of the sources for Mangalore. The recent inspection of the Deputy Sanitary Engineer, Southern Circle, showed that the most appropriate supplemental source of supply to Mangalore would be the Hurpur river. The river is tidal for a distance of about 12 miles from its mouth. The tidal influence extends to a distance of about 2 miles upstream of the Gurpur road crossing. Above this point the water is reported to be always fresh and there are a number of baling stands on either side of the river in this reach, for lifting water for irrigation purposes. The river is about 400 feet wide and flows with at least 3 or 4 feet depth during the monsoon. The local reports have it that about the middle of January the water covers the entire bed of the river and later on the flow gets reduced. According to them, even in the driest parts of the year there are pools of water standing in the bed here and there, even after the surface flow stops. From a visual survey it appears that there is a reasonably good depth of coarse sand in the bed. This is also confirmed by the information gathered from the foundations of the bridge which was recently constructed. The depth of sand appears to have varied from

15 to 35 feet at the site of the bridge. It is therefore reasonable to expect an adequate storage of subsoil water which would lend itself for tapping through a series of wells.

3. The Gurpur river, as will be seen from the index plan P.H.No. 56/39 enclosed, lies beyond the Hassamar valley, and supplementing the supply of the Hassamar valley, from this source would be an economical affair. For, should the supplemental source lie in a different direction from the Hassamar valley, it would involve laying additional lengths of mains. Moreover, the monsoon and a few weeks following would be times of plenty and it may be possible to meet even the entire demand of the town from the Hassamar valley itself without recourse to pumping, from the Gurpur river. From the index plan it would appear at first sight as though the location of the sources of supply and the alignment of the pumping main could be advantageously located at the nearest point of the Gurpur river from the Hassamar. The Deputy Sanitary Engineer, Southern Circle, who reconnoitered the area has ruled out this possibility in view of the undulated nature of the country with deep valleys and high ridges. However, this point could be more tersely decided upon when an investigation is taken up.

4. The Hassamar valley scheme, at present rates with an increase in size of main to carry 15 gallons per head per day and a bigger service reservoir, would cost approximately Rs 9,00,000 to instal and Rs 4,500 to maintain annually. The cost of the supplemental scheme will be Rs 5,00,000 to instal and Rs 19,500 to maintain annually. Its cost of investigation would be Rs 4,300/-.

I Hassamar Valley — Rs 9,00,000 — 4500

II Supplemental Scheme — Gurpur river Rs 5,00,000 — 19500

14,00,000 — 24,000

5. The natural question would arise, why not tap the Gurpur river itself for supplying the entire town? Doubtless it could be done, but the cost of maintenance would be prohibitive even if the increase in the initial cost could be ignored. It would seem unwise not to take advantage of the natural facilities which the Hassamar valley affords for

supplying

supplying the town for a major part of the year. It would be most economical to develop the Hassamar valley and supplement the supply from the Gurpur. The extra cost in case full supply is to be pumped from the Gurpur river will be about Rs 10,000/- which amount, if capitalised, would work out to about Rs 2.86 lakhs. This is based on the assumption that the Hassamar valley can give only 10 gallons per head per day for 60,000 people even during the monsoon months. As stated already, it would be quite possible to draw 15 gallons for 1,00,000 people during the monsoon period from the Hassamar valley. If the full quantity of supply is drawn during the monsoon months, restricting the supply from the supplemental source, to only 8 months in the year, there would be a further saving of Rs 5,000 in the maintenance cost, which, if capitalised, would amount to Rs 1.43 lakhs.

6. My considered recommendations are:-

(1) The Hassamar valley scheme should be proceededwith without any further delay, as it should in any case, form one of the sources to the town and that orders might issue to have the detailed plans and estimates prepared so that the execution might be started at least in 1941-42.

(ii) The investigation of the Gurpur source should also be taken up so that the scheme might be taken up for execution after the Hassamar valley scheme functions for a year or two. The experience gained in the working of the Hassamar valley during a year or two, would go a great way to fix, to what extent the supplemental source should be drawn upon.

(iii) The Deputy Sanitary Engineer, Southern Circle, while at Mangalore, explained the position at an informal meeting of the Council on 24-3-1939. I understand from him that the Council was agreeable to the proposal.

(iv) One other aspect of the question deserved consideration. In the first instance, the distribution system might be laid in the congested areas, viz., wards 2, 3, 4 and portions of wards, 1, 5, 7, 8 and 9 where the want of water supply

is ~~keenly~~ acutely felt. This would give these areas even 15 gallons to start with. The distribution system could be so designed that it could be extended to portions of the town when the supplemental source from the Gurpur is developed. 21795

(v) If the council is agreeable to the schemes outlined in the foregoing paragraphs, it might be requested to place Rs 700 at the disposal of this department for carrying out an investigation and to collect the necessary data for the gravitation main and the distribution system from the Hassmar valley. If the Council is desirous of taking up the investigation of the Gurpur source simultaneously, it might deposit an additional sum of Rs 4,300 for the purpose, to the credit of this department. 700 4300 5000

(vi) As regards the drainage scheme, the Council's attention may be invited to G.O.No.116 P.H. Ms. dated 17-1-1933 where the further consideration of the scheme already investigated, had been dropped for the present at the instance of the council itself. (P)

7. I return the enclosures to the reference under reply.

Sir,

The Municipal Council at its meeting held on 26th July 1939 has accepted the scheme outlined by the Superintending Engineer (P. H. Branch) and has sanctioned the payment in due course of Rs.5,000/- towards the investigation. The question of financing the scheme has not been decided by the Council. The Scheme has got to be financed by levying water and drainage tax and the Municipal Council is aware of this. I request that Government may be pleased to state

state at what percentage the water and drainage tax has to be levied so that the Municipal Council can resolve definitely on the financial aspect of the scheme. In the meanwhile the question of investigation may be ordered to be further proceeded with.

A copy of the Council resolution in the matter is enclosed.

Sir,

I submit herewith a copy of Council resolution No.61 dated the ~~15th~~ 5th ~~January~~ February 1940 wherein the Municipal - Council has decided to levy a water tax of 1 per cent every half year from 1st October 1940 to start with.

The Council has resolved to levy a lighting tax of 1/2 per cent every half year and an education tax of 1/2 per cent every half year and hence a Water & Drainage tax of 1 per cent per half year is considered sufficient at

at present. The question of levying a further percentage of water tax will be considered later. I am to request Government to accept the levy at 1 per cent per half year for the present and proceed further in the matter.

" Commr. Nangalur Nly No. 1250 9 3-8-38

Water-Supply. Nangalur Mk-el.
Investigation.

It will be observed from paras 4 to 6 of the letter of the S. E (P.H) on pp 10-11 of -that the Hassarmen Valley scheme estimated to cost approximately Rs. 9 lakhs to instal and Rs. 1,500 to maintain annually is proposed to be taken up first. Since the Nangalur Mk-el: has expressed its willingness to place the sum of Rs. 5,000 required to meet the cost of investigation of both the Hassarmen Valley scheme and the Gurupur source, the ability of the Council to finance both the schemes will have to be examined. The file may first be sent to L.A C.O to examine the financial position and to specify the rate at which W & D tax will have to be levied by the Council.

24/8/39

The Cost of the Water Supply Scheme for the Mangalore municipality is as shown below:-

I. The Hassamar Valley (a) Installation - Rs 9 lakhs.
(b) Maintenance - Rs 4,800.

II Supplemental Scheme - Gurpur river -
(a) Installation - Rs 5 lakhs
(b) Maintenance - Rs 19,500.

III Investigation. (a) Hassamar Valley - Rs 700
(b) Gurpur river - Rs 4,300.

The total cost of both the Hassamar Valley and the Supplemental ~~Scheme~~ works out to Rs 14 lakhs to instal and Rs 24,000 to maintain and Rs 5,000 for investigation of both the Schemes.

2 As regards item III - Investigation - Rs 5,000. The Council in its resolution Resolution No 59 dated 26.7.1939 agreed to place the sum of Rs 5000 for investigation at the disposal of the Superintending Engineer.

3 With reference to the Cost of both the Schemes - Rs 14 lakhs. The Council will have to take a loan of Rs 7 lakhs from the Govt for its share on half grant and half loan basis. It is ~~Set~~ and ~~that~~ The Council is not levying W & D tax till now

Hence there are no accumulations under W&D Fund. The Council's share of Rs 7,00,000 has to be met by loan from the Govt. The annuity on the loan of Rs 7,00,000 repayable with interest at 3½% in 30 years works up to Rs 38,059 and the Maintenance charges come to Rs 24,000. Hence the Council will have to find Rs 62,059/- annually in order to finance the Water Supply Scheme.

4. ~~The Council does not levy W&D tax.~~ According to the Budget Estimate of the Council for 1939-40, a levy of 10 p.c. Profession Tax brings in an annual income of Rs 1,28,400. In order to get an income of Rs 62,000 (in round figures), a levy of water and drainage tax at the rate of 5 p.c. is necessary. With the levy of 5 p.c. tax, the Council can finance the scheme. Moreover the Schemes will take five or 7 years to be completed. If the Council levies the tax from 1940-41 onwards and accumulates the amount, it need not have to borrow so much and the loan amount can be cut down by nearly fifty per cent, in which case the rate of tax can be reduced by about ½ per cent.

With these remarks the file may be sent to Ex Dy Deputies.

pp 24-26 q

p 104 Madras Code Vol III
Book no 17-13
in the Shelf

to levy with effect from 1-10-40 the W & D tax at 2 p.c annually stating that no portion of the tax proceeds should be ear-marked for drainage purposes. The resolution seems to be defective in two respects viz 1) that under the third proviso to Sec. 78(3) of the M.D.M Act, 1920, any alteration in the rates fixed should not be ~~made~~ given effect to in the middle of a year, and 2) that under the first proviso to Sec. 81(1) of the Act, it is obligatory on the council to declare the proportion of the tax which should go to water works and drainage works. Legal may perhaps be consulted in the matter.

2. d. A. Rane stated that the Council should finish levying a water tax of 3 p.c from 1-4-40 on the assumption that the Scheme will be ready for execution in 1940-41. The Council has agreed to levy 2 p.c W & D tax and in addition a lighting tax of 1 p.c and an education tax of ~~another~~ one per cent ~~was proposed to be levied~~. As it will be possible for the Council to set apart a portion of the surplus in the Genl. account for expenditure on the water supply Scheme and as the

execution of the scheme is not likely to be taken up in 1941-42 (investigation has to be completed, plans and estimates have to be prepared thereafter) it is not likely that on or even in 1942-43, L.A. may be requested inter alia to state whether the Council's decision to levy the W & D tax at 2 p.c. may be accepted and the investigation of the scheme sanctioned.

3. The file may be sent to legal and L.A.

E & P Memo 3263 1-3 E & P II 28-2-40

1541

ASSISTANT SECRETARY I
28 FEB 1940
LEGAL DEPARTMENT

Legal Department

The water and drainage tax is a part of the property tax - See section 81 (1) (b) of the District Municipalities Act. Consequently, the levy of a water and drainage tax involves an alteration in the rate of the property tax and by virtue of the third proviso to section 78 (3), the property tax cannot be altered during the middle of a year. The proviso to section 81 (1) does not contemplate the amount

realized from water and drainage tax to be utilised on water works alone. It is therefore obligatory on the municipal council to declare the proportion in which the amount should be utilized on water works and drainage works. This Department may therefore agree with the view expressed by E. & P.H. in paragraph 1 of their note at pages 6 and 7 ante.

2. It may however be pointed out that under section 25 of the Public Health Act, it is open to the municipal council to levy, with the sanction of the Government, a water tax and to earmark the net revenue therefrom for expenditure on the execution maintenance and improvement of works of water supply - See sub-sections (1) and (4) of that section. E. & P. H. may consider whether the municipality cannot take action under this section.

2/3/40

As above - It may also be pointed out that the Municipality proceed under s: 25 of P.H. Act, and levy the tax as an addition to property tax, the provisions of the P.H. relating to that tax will apply - Under this the provisions of s: 28 (1) will apply unless the Govt. by a rule exempt the properties under it is applicable whether the question (see s: 2 (2) of P.H. Act. Reg

SECRETARY TO GOVERNMENT
5-MAR 1940
LOCAL ADMINISTRATION DEPT.

L.A Dept

Under the third proviso to Sec 78 of the MDM Act, 1920 where any resolution of the Council re tax for any particular year has taken effect no proposals to alter the rates or date fixed in such resolution so far as that year is concerned shall be taken into consideration by the Council. In its resolution No 61 dated 5th Feb. 1940 p 26 of the Mangalore munl. Council has resolved to levy with effect from 1-x-40 a half yearly w+s tax at 1½ per cent (half yearly) [i.e. 3 per annum] of the annual value of buildings & lands in the municipality and has ordered publication of the necessary notification in the Dt Gazette under Sec 78. The Council can therefore legally ~~levy~~ levy the w+s tax from 1-x-1940. Under the first proviso to Sec 81(1) of the MDM Act, 1920 the Council should declare what portion of the tax is levied in respect of water-works. Inasmuch as the Council has failed to ~~specify~~ declare the portion of the tax to be reserved for water supply action under Section 25 of the Public Health Act, may be taken as advised by the Legal Dept.

Vide for 31/3 3752-A 279-39

Vide fo 9 ante

2. As regards the financial of the W. S. scheme on the basis of a 2 per cent tax, if the scheme cannot be taken up for execution till 1943-44 as noted by Ex Pt. report on page 8 ante, the position in the W & S fund will be as shown under:-

Vide N.

The Hassanwar valley scheme is to come first as the main scheme and the Supplemental scheme coming in a year or two thereafter. Assuming that the main scheme is taken up in 1943-44 and finished in 3 years the position would be as follows:-

Vide p5 ante.

	Rs
W & S tax receipts @ 1% from 1-X-40 to 31-3-41 (1% half yearly for 2 p.c. annum)	6,400
Do receipts at 2% p.a. for 5 years.	128400
Total yield from tax	134800
Interest on the accumulations (1% may bring in about)	6300
	5580
Total .. Rs	14 1100
	14 0400

1% (annual) yields Rs 12840.

12840 X 2 ~~+ tax~~

25680 X 5 yrs

128400

7780 - 3 | 1284
3460 - 2 | 2312
1540 - 1 | 1669
| 1091
| 6356

The total yield may be taken as Rs 1.4 lacs. The Council will have to borrow towards its half share of the initial cost Rs 3.1 lacs and the annuity thereon at 3½% interest for 30 years (Rs 16855) and maintenance charges (Rs 4500) would amount to Rs 21,355. The proceeds of the tax at 2% (annual) amounting to Rs 25,680 would enable the Council to maintain the Scheme and leave a surplus of Rs 4,325 only from 1946-47. The Supplement

4.50
1.40
3.09 = 3.1 lakhs.

5437 X 3
16311
544
16855

25680
21355
4325

scheme when taken up a year or two after the main scheme has been in operation would involve a further borrowing of Rs 2·37 lakhs assuming that the Council is able to get 3 years Surplus of Rs 13,000 accumulated, between the years 1946-47 - 1948-49 and the execution takes about 2 years for Completion. The annuity on the additional loan (Rs 12876) and the maintenance charges (Rs 19,500) would amount to Rs 32,376. The Available Surplus being Rs 4325, an additional 2 per cent tax would be necessary. The quinquennial revision will make up the deficiency to some extent ~~difference, if any, in the amounts~~

Thus if the Council levies a water tax at 2 p.c. annual in 1940-41 (October) and agrees to increase it by another two per cent when the supplemental scheme is taken up for execution it can finance both the schemes.

With these remarks the file may be returned to the Exptl. Deptt. No.

E&PH

Please see the notes from from p. 7 ante. L.A. state that the M. Council can legally levy the tax from 1-10-40 (Legal have not however agreed with this view). In view of the precedent in G.O. No. 3752 L.A. 27-9-39 quoted by L.A. in support of their view and also of the Council's decision to levy the tax from 1-10-40, it seems that no objection need be taken by Govt. in this case.

2. Legal suggest that the Council should levy the ~~water~~ tax under Sec. 25 of the P.H. Act, 1939 as it does not propose to set apart any portion of the tax proceeds for drainage purposes as required by the first proviso to Sec. 81(1) of the M.D.M.A

The Govt. may accord the necessary sanction under Sec. 25 of the P.H. Act and advise the Council to levy the additional tax at 2 p.e (annual) as soon as the supplemental scheme is taken up.

3. The investigation of the scheme may be sanctioned. A draft order is placed below for appl. It may be sent to Finance for acceptance. Legal may see first with reference to para 1 & 2 above.

In the previous note it was not made clear that the assessee was paid before the commencement of the financial year in which the tax was imposed. p.26, c.f. file 15/8/40

pp 8/9 ante

of that year. There seems to be no legal objection to altering the rates of the tax before the commencement of the year, with effect from some date in that year. In this case, the resolution imposing the additional tax was passed in February 1940. The fact that the tax is to be imposed with effect from the 1st October 1940 will not invalidate the levy. In paragraph 1 of the previous note of this Department, no reference is made to the fact that the levy of the tax was made by a resolution which was passed before the commencement of the financial year.

Finance (Exp.)

Mangalore Chee

ASSISTANT SECRETARY TO GOVERNMENT
19 JUN 1940
FINANCE DEPT.

The proposal in this file relates to the Mangalore Municipal Council water supply scheme which is estimated to cost as follows:-

23/6/40

	Main scheme. (Hassamar Valley)	Supp. scheme. (Gurpur River)
	Rs.	Rs.
1. Investigation	700	Rs 4,300
2. Installation	9,00,000	5,00,000
3. Maintenance	4,500	19,500

The total cost of both the schemes works out to Rs 5,000 for investigation, Rs 14 lakhs for installation and Rs 24,000 for maintenance.

The Municipal Council in its resolution dated 26-7-39 has agreed to place the sum of Rs 5,000/- for investigation at the disposal of the S.E. (P.H.) and has actually placed a sum of Rs 700 at the disposal of the S.E. (P.H.) for investigation of the main scheme.

2. E.P.H. propose to sanction:-

(i) the preparation of plans and estimates for the maintenance scheme and the investigation of the supplemental scheme after the Council places Rs 4,300/- at the disposal of the S.E. (P.H.).

ii) the levy by the Municipal Council of a water supply and drainage tax at 2% p.a. with effect from 1-10-40 under Section 25 of the M.P.H. Act, 1939, for financing its share of the main scheme and to ask the Municipal Council to report whether it agrees to the levy of an additional 2% tax for financing the supplemental scheme.

3. It is proposed to take up the main scheme in 1943-44 and finish it in 3 years and to take up the supplemental scheme a year or two there-

thereafter. The levy of the Water supply and drainage tax at 2% per annum from 1-10-40 is expected to yield about Rs 1.41 lakhs by 1946-47.

The Council has to find funds for payment of the following annuity on the ~~loans~~ loans to be taken from the Government and also to meet the maintenance charges:-

(1)	Main scheme. (2) Rs	Supp? scheme. (3) Rs
Total estimated cost	9,00,000	5,00,000
Municipal Council's share	4,50,000	2,50,000
Deduct Anticipated yield from W.S & D.tax to be levied from 1-10-40.	1,41,100	13,000 ** (roundly)
Net amount to be borne by the Municipality by taking loan from Govt.	2,08,900	2,37,000
Annuity at 3½% (provl) for a term of 30 years.	16,795	12,876
Maintenance charges	4,500	19,500
Total annual liability	21,295(A)	32,376(B)
Estimated annual proceeds of W.S & D Tax at 2% p.a. ~~from 1-10-40 available to meet liability~~.	25,680	
Surplus available to meet(B) ⊗ [25,680 — 21,295]	4,385⊗	

Rs 53,671

** (surplus for 3 years) from 1946-47 in the Water Supply and Drainage Fund after meeting annuity and maintenance charges on the main scheme.

In order to enable the Council to find funds to meet the annuity and maintenance charges in respect of the supplemental scheme, L.A. propose that the Council should agree to levy an additional W.S. and D. tax at 2% per annum. Even if an additional 2% tax is levied, the yield will be only Rs 25,680 against the required amount of Rs 27,991 leaving a deficit of Rs 2,311. L.A. consider that the quinquennial revision will make up the deficiency to some extent.

4. As the actual position will have to be ascertained only when the question of sanctioning a loan arises and as the present proposal is only to sanction the preparation of plans and estimates for the main scheme and investigation of the supplemental scheme, the draft order may be accepted and the case returned to E and P.H.

Water Supply scheme.

Mangalore M-cl. Investigation & preparation of Plans & estimates &c. of - Sanctioned

---

p 3 of

In its resolution No. 4 dy 15-5-38, the Mangalore M. Council resolved that a protected water-supply system and a drainage scheme should be provided in the municipality

pp 7-9 of

The S. E (P.H) pointed out that a protected water-supply scheme should be ~~taken up~~ provided soon and recommended

pp 10-11 of

1) that the Hassamar Valley scheme estimated to cost approximately Rs. 9,00,000 to instal and Rs. 4,500 to maintain annually should be proceeded with immediately,

2) that as the Hassamar Valley

scheme should form one of the sources to the town, orders might be issued asking the M.C. to place Rs. 7000/- at his disposal to carry out the investigation and permitting him to ~~boom~~ prepare the detailed plans & estimates ~~prepared~~ so that the execution might be started at least in 1941-42, and 3) that the investigation of the Gurpur source, which is to serve as a supplemental scheme, estimated to cost Rs. 5,00,000 to instal and Rs. 19,500 to maintain annually might be sanctioned. And that the Council asked to deposit a sum of Rs. 4,300/- towards the cost of investigation.

p 12 of

2. The Mangalore M.C. has accepted the proposals of the S.E (P.H) and placed a sum of Rs. 7000/- towards the investigation of the Hassamar Valley scheme. It has also agreed to place at the disposal of the S.E (P.H) the sum of Rs. 4,300 required to meet the cost of investigation of the Gurpur Source.

p 20 of

p 21 of

~~The proposal to phase the scheme was dropped by the Council~~

~~The Council does not desire to take up the above scheme for the present.~~

p26 of

3. The Mc. of. has in its resolution No. 61, of 5.2.40 agreed to levy a water & Drainage tax at 1½ p.c per half-year with effect from 1-10-40 to enable it to finance its share of the cost of the water-supply scheme. It has however decided that no portion of this tax should be set apart for drainage purposes at this ~~required by the first~~ under the first proviso to Sec. 81(1) of the M.D.M. Act, K the Council should declare ~~does not contemplate the amount~~ what portion of the tax is levied ~~realised from water & drainage~~ in respect ~~tax to be utilised~~ of water works, ~~alone~~. An examination of the financial position of the Municipality shows that unless the Municipal Council utilises the entire proceeds of the W & D tax proposed to be levied at 2 p.c (annual) with effect from 1-10-40, it will not be possible for ~~the~~ it to finance its share of the cost of the Hassanan valley

Scheme. Further, the Supplemental Scheme viz Gurupur Source Which is to be taken up a year or two after the main Scheme has been in operation cannot be financed by the Council without an increase in the levy of water and drainage tax by 2 p.c per annum. If therefore a portion of the W & D tax is set apart for drainage purposes, it will be necessary for the Council to levy the tax at an enhanced rate from 1-10-40 itself. In the circumstances, ~~the~~ H.E the Governor of Madras ~~Govt.~~ in exercise of their powers under Sec. 25 of the M.P.M. Act, 1939, is pleased to Sanction the proposal of the Mangalore M.C. to levy W&D tax at 1 p.c per half-year with effect from 1-10-40 for providing water-supply in its Area. As this tax is an addition to the property tax, the provisions of the M.D.M. Act, 1920 relating to this tax will apply.

4. The Govt. Sanction

the preparation of plans and estimates for the Hassanur valley scheme. The investigation of the Gurpur source (Supplemental Scheme) should be taken by the S.E (P.H) ~~only~~ after the M. Council places at this disposal the sum of Rs. 4,300/- required towards the cost of its investigation. The Commr. of the Mangalore Mly. is requested to place the amount of Rs 4,300/ at the disposal of the S.E (P.H) and to report whether the Council agrees to enhance the rate of W & D tax by two p.c. ~~to enable~~ in order to finance its share of the cost of the Supplemental Scheme.

Station Mangalore, *Dated the* 12th August 1940.

From (Name) Sri M. Narayana Shenoy, B. A., B. L.,
(Designation) Commissioner, Mangalore Municipality.

To The Secretary to the Government of Madras,
Education & Public Health Department.
Fort St. George,
Madras.

Through
The Chairman,
Municipal Council,
Mangalore.

Sir,

I submit herewith a copy of Council's resolution No. 2, dated the 15th July 1940. p3 infra

The Council has resolved to pay Rs.4,300/- required towards the cost of investigation of the Gurpur Scheme in 1941-42. The Council is willing to enhance the rate of water and drainage tax by 2 per cent more as soon as the scheme

p469(2)

scheme is actually taken up.

2 As certain doubts arose as to the validity of the previous resolution of the Council - No.61, dated the 5th February 1940 - copy enclosed - the said resolution was cancelled by the Council and it was resolved to publish fresh notice stating the intention of the council to levy every half year with effect from 1st April 1941 water and drainage tax at 1 % of the annual value of the properties for providing water supply in its area.

Resolution No. 2

(2)

Read: G. O. No. MS., 2934 P.H., dated the 3rd July 1940 sanctioning the proposal of the council to levy water and drainage tax at 1 % per half year with effect from 1-10-1940 for providing water supply in its area and also requesting the Commissioner to place an amount of Rs.4,300 at the disposal of the Superintending Engineer and to report whether the council agrees to enhance the rate of water & Drainage tax by 2 per cent in order to finance its share of cost of the supplemental water supply scheme from Gurpur.

Items Nos. 2 and 14 were considered together. Fresh Notice to be published stating that the council intends to levy every

half year with effect from 1st April 1941 water and drainage tax at 1 per cent of the annual value of properties for providing water supply in its area.

As doubts have arisen as to the validity of the previous Resolution No.61, dated the 5th February 1940 the said resolution is hereby cancelled. The payment of Rs.4,300/- is sanctioned and will be paid in 1941-42.

The council agrees to enhance the rate by 2% as soon as the scheme is actually taken up.

61. Read report of the Committee appointed as per Council Resolution No.69, dated the 30th October 1939 on the Government Memorandum No. 326312 E2, P.H., dated the 20th October 1939 on the subject of investigation of water supply scheme of Mangalore Municipality.

Proposed By Dr. U. P. Mallya and seconded by Dr. N. Upendra Pai, that a water and drainage tax at 1 % of the annual value of lands and buildings within the municipality be levied every half year with effect from 1st October 1940. No portion of the tax will represent tax for drainage. Time for objection will be two months from the date of notification. Notification under Section 78 to be published in the District Gazette, Swathanthra Bharatha and Rukno.

Carried unanimously.

The Chairman, Municipal Council, M a n g a l o r e.

Sir,

Subject: Water-supply scheme for Mangalore Municipality Investigation and preparation.

The investigation of a water supply scheme for this Municipality was sanctioned in G.O.No. 2934 P.H., dated the 3rd July 1940. In pursuance of the post-war reconstruction program the investigation of the scheme having been taken up by the Sanitary Engineer to Government, a sum of Rs.5,000/- has been remitted into the District Treasury on 9th February 1945 being t contribution for the investigation and preparation of the detailed plans and estimates for the scheme. The council in its resolutio No.56, dated the 11th June 1945 has resolved to have a 15 gallon scheme for the municipality. It has further resolved to request Government and the Sanitary Engineer to speed up th with the scheme. A copy of council resolution No.56, dated the 1945 is enclosed. I request Government may be pleased

to pass such necessary orders to implement and the resolution of the council as kindly deemed fit.

Commissioner.

Office of Sany. Engr. to Govt.

Endt.No. 6347-1/45 WS/39-5-WS d/3-7-45.

Forwarded through the Chief Engineer, P.W.D. (Gl.B & Defence).

2. The investigation of a scheme of water supply to the town is now in progress, and would be temporarily suspended owing to south-west monsoon weather at Mangalore. The work will be resumed after the monsoon is over.

3. The scheme now under investigation provides for a 15 gallon supply per head per day from the two sources (Hassamar valley gravitation scheme and Gurpur river pumping scheme).

4. Mangalore Water Supply is assigned 31st place in the Provincial Compendium. By speeding up the investigation, the Municipal Council perhaps means that the stages subsequent to the investigation may also be expedited. This is automatically ensured in the order given in the Provincial Compendium.

5. The Commissioner's letter stating that the deposit of Rs.5000/- made by the Council is for investigation and also preparation of detailed plans and estimates, is not correct. He has been informed in No. 1152-2/45 Ac. d/ 16-2-1945 that this deposit amount of Rs,5000/- is only towards investigation charges, and does not include preparation of detailed plans & estimates.
